

Teacher Quality Mathematics Courses

The Department of Mathematics at Texas Wesleyan University will offer two mathematics Teachers Workshops for Elementary School and Middle school Teachers.

The first is an intense summer workshop ([Summer 2008](#)) that will provide elementary and middle school teachers with fundamentals for use of mathematical thinking in day-to-day situations. The program includes fundamental analysis, techniques and modeling in teaching applications of mathematics.

Summer 2008

COURSE INFORMATION:

Course: MAT 6370 **Mathematical Applications**
Time: 1:00 – 4:30 pm
Dates: June 30 – July 18 SST #116
Instructor: Dr. Mary Landers
Conferences: **Conference for Advanced Mathematics Teaching (CAMT)**
Dallas, Texas

The second is a continuum of the summer program. The [Fall 2008/Spring 2009](#) course will emphasize inquiry-based, process-oriented, cooperative learning strategies in the area of mathematics. Methods will reinforce teaching of the discovery method and will encourage development of activities specifically designed for the elementary and middle school classroom.

Fall 2008/Spring 2009

COURSE INFORMATION:

Course: MAT 6371 **Mathematical Discovery**
Time: 9:00 – 12:30 pm
Dates: Every other 1st and 3rd Saturday of the month (Exact dates TBA) SST #116
Instructor: Dr. Mary Landers

Books will be provided for the courses and some funds will be available for the CAMT conference.

To registrar for the courses, go to the Texas Wesleyan University Web site. For further information please contact:
