## Texas Wesleyan Software Standards

### University Baseline Software Suite

ICT offers standard support for University Baseline Software.

Below is the list of baseline software that will automatically be installed on any new equipment acquired by the University.

#### Applications:

- Microsoft Windows XP Professional
- Microsoft Office 2003 Pro (includes Access, Excel, PowerPoint, Publisher, & Word)
- Microsoft Outlook 2003
- Microsoft Internet Explorer
- Microsoft Windows Media Player
- Cute PDF Writer
- Mozilla Firefox
- Symantec Anti-Virus
- WS-FTP LS

#### Browser Plug-ins:

- Adobe Reader
- Flash Player
- Java2 RunTime Environment
- MS Media Player
- QuickTime
- Real Player
- Shockwave Player

### Non-Baseline, Site-Licensed and Discipline-Specific Software

ICT will only provide installation support for non-baseline, site-licensed software packages and discipline-specific software packages.

ICT does not support non-Windows operating systems, DOS-based software, or software installed on privately-owned computers.

### Unlicensed Software

In compliance with state, federal, and international laws, ICT will only provide removal support for unlicensed software. Any software not accompanied by a legal license with the manufacturer's terms of use will be considered unlicensed.

Unlicensed software is subject to immediate removal from university-owned machines upon identification.
